

## Environmental and Energy Policy

All environmental standards are represented in our business, especially in the field of work through the core business:

### **Engineering activities and related technical consultancy**

We deliver our vision and mission through professional work, development and innovation of services, methods and procedures in the processes of operation and business with the aim of satisfying the needs of all interested parties by applying a standardized environmental management system and striving to achieve the satisfaction of the owners, employees and the local community. In order to implement the standards, the Management Board and all our employees are committed to meeting the needs and demands of interested parties in a timely manner, accurately, credibly and responsibly, in full compliance with the requirements of environmental management system requirements through the realization of the established environmental objectives.

We comply with our environmental management system in accordance with international standards

**ISO 14001: 2015 / HR EN ISO 14001: 2016**,  
That is currently being introduced in all business sectors of our system;

- Our employees are continually trained and motivated to perform their tasks in

accordance with environment protection policy, and to do all that is necessary to protect themselves, citizens, associates, equipment, and to prevent environmental pollution;

- We recognize and follow all identified ecological aspects as well as legal regulation;
- We continuously reduce all identified negative impacts on the environment;
- We meet the general and individual environmental goals;
- We use rationally natural resources through the promotion of environmental policy at all levels;
- Preventing environmental pollution;
- Prevention of accidental situations in the environment;
- Permanent obligation to implement environmental protection policy;

Environmental objectives and tasks in the area of the environmental management system are accomplished with the expertise, experience and motivation of our employees and with constant care for improving their education and applying environmental management system requirements through compliance with the legal regulation.
